June 26, 2012

To Whom It May Concern:

I would like to take this opportunity to offer my support to Grafton Technologies Inc. for applying for the Illinois Gibabit Community Challenge Grant.

I believe this grant has the potential to enhance the internet service for many communities in our county which are in great need of this assistance.

Our County is in desperate need of job growth and this project would be a great benefit in achieving that goal. The economy is very difficult for rural America and we here in Jersey County would be very grateful for the opportunity to create jobs for our citizens.

Thank you for any consideration you might be able to provide.

Sincerely,

Pam Heitzig
