Grafton, IL 62037

June 15, 2012

To Whom It May Concern:

I am writing to express my support for Grafton Communication Fiber Gigabit Project to improve broadband service to Pere Marquette State Park and the surrounding area. This project will provide important services to the public, including improved safety and security, and broadband access for park visitors and staff. These improved services will also enable us to implement exciting educational programs such as our live "Eagle Cam" project.

Grafton Communications has partnered with IDNR by volunteering its time and equipment for several important projects. We appreciate this leadership in the community, and their efforts to provide broadband services throughout Jersey County.

IDNR and the staff at Pere Marquette State Park look forward to working with Grafton Communications on this project.

Sincerely,

Pam Warford
Site Assistant Superintendent
